Soft-Skill Course on International Project Management in CFRP Development Programs

Jan Onne Backhaus

Technical University Hamburg

The Doctoral School, in cooperation with the MUL² group the FULLCOMP project, is pleased to announce a soft-skill course on International Project Management with focus on environment with composite structures and materials activities.

Content

1. Greeting & Introduction Round
2. Orientation: Goals, expectations, experiences in the group, self-evaluation
3. International Project Management
 - a. PM Basics
 - b. Tasks, Goals, Structure, Roles
 - c. Project Phases
 - d. Stakeholder Management
 - e. Communication
 - f. Team Development
 - g. Introduction to Lean Project Management
4. Optional Topics integrated depending on available time
 - a. Quality
 - b. Supplier Management
 - c. Risk Management
5. Exit, Evaluation, and Feedback

Venue: Aula 1B

Date: 21 June 2018, from 8:30 to 14:30

Executive Summary of Dipl.-Ing Jan Onne Backhaus, MBA

Mr. Backhaus has studied at Leibniz University Hannover (Germany), University of Alabama (USA), Technical University of Vienna (Austria), University of Applied Science in Hamburg (Germany), and University of Economy and Management (FOM), Hamburg. He holds a M.Sc. degree in civil engineering where he focused on structural mechanics and computational engineering. In 2005 Mr. Backhaus joined the Hamburg aerospace industry where he was responsible for the technical development of certification methods and R&D projects including

design, structural testing and NLFEM simulations. Working in Hamburg (Germany), Toulouse (France), Kuala Lumpur (Malaysia), Bangalore (India) and New Delhi (India) Mr. Backhaus build, trained and led several multi-national engineering teams. From 2010 on Mr. Backhaus held the position of Director Offshore at ELAN-AUSY – a 1st Tier supplier of Airbus with ~350 employees. He led an international, multi-disciplinary team, was responsible for the development and implementation the company offshore strategy, consulting of the executive board on offset and military export issues and the set-up of a low-cost supplier base including the development of group internal offshore subsidiaries. In 2017 Mr. Backhaus obtained his MBA from FOM University, Hamburg. Today Mr. Backhaus works at Technical University Hamburg and offers his service as free consultant where he supports organizations in complex engineering projects, international management and intercultural communication.
